

Burning James & the Funky Flames Venue and Electrical Requirements

Stage and Access Requirements

Band will need a stage area of sufficient size to accommodate a 5 piece band, preferably 20' (minimum 16') across the front and 12' deep, on a solid, dry, and clean surface. Stage area must be reasonably accessible by vehicle and for hand carrying of heavy equipment. Band cannot perform if engagement is on a second floor and above or in basement without elevator service. Band must be allowed 5 parking spaces within reasonable proximity to the stage area.

If stage is elevated, stairway or ramp access must be provided.

Stage (and electrical feed) not to be within 20 feet of standing water, swimming pools or ponds.

Electrical

The band requires a minimum of three (3) separate and dedicated 20 am circuits with quad box or multi outlet strip each. These must be exclusive to the band and positioned as per stage plot or in reasonably close proximity to the performance area during agreed setup time and during performance.
